Beyond Control

Much Valuable Timber Lost In Districts That Are Burned Over

TRAPPERS BLAMED FOR DEVASTATION

Reinforcements Are Sent In To Help Rangers Battle Flames

Four big forest fires, three of them out of control, and at least a dozen smaller fires, all of which

are being held, are raging in Alberta today and the situation is critical. Thousands of acres already have been burned over, much of it valuable timber, and

some districts are cut off from communication with Col. R. H. Palmer, D.S.O., chief fire ranger, who is keeping as closely in touch with the situation as pos-

Jealousy between the different types of trappers is given as the cause of the greater number of fires in the north and the matter is receiving the special attention of Ot-

Worst at Clearwater

The worst fire now raging is at Clearwater in the McMurray area. Getting out of control on Sunday this fire drove the fire fighters out of the district and at the present

SICKNESS COSTS CITY TIDY SUM

Reports on accident and sickness among city employees presented to the city council on Monday show that in 1925, loss to the city from these causes amounted to \$1,872.29.

Order is rescinded
Mr. Cooper supplied figures which showed that the company paid between five and six thousand dollars in taxes and some \$1,000 in salaries, while the city gained invaluably in other ways from the building of two aerators and sedimentation tanks at a cost of about \$10,000.

Want Gun Removed
A petition was presented asking for the removal of four of the captured German guns now standing outside the Memorial Hall, to Herby Park. The council ordered the matter held over until a delegation from the G.W.V.A. had been heard.

Lead sheathing of a telephone cable at 105th Street and 81st Ave. was found to have been damaged by lightning on a 22 ft. pole. The damage was found to be a nearby pole. The damage was found to be a nearby pole.

HOME OWNERSHIP

--And now is the time to build in Edmonton

THE road to permanent happiness and real prosperity is the way of thrift. The solid happiness that is of the home is only in the home that is owned; for there is no security in the house that is merely rented.

What a sense of well-being and what real contentment is in home ownership. You have perhaps dreamed for years of having that house—with everything arranged just as you want it—with your garden and the rooms laid out as you have planned. And you do not have any place for landlords in that dream plan, for you know that home ownership is real thrift.

Sometimes when you look at your sheaf of rent receipts you realize just what it means to own your own

home and pay this rent money to yourself. And the sooner you begin building your own home, the sooner you will quit paying rent.

Now is the time to start—this year, while building materials and labor are lower than they will be in the future. Remember that rents, as well as materials will grow constantly higher in the Edmonton district. There is no time like the present to begin.

And it is not so hard to begin. There are many reputable firms that will help you with the details of financing, etc. And the concerns on this page will give you every assistance in the way of advice and service in their special lines.

Own
your
home!

*Consult these firms at any time.

Sloping Lines Lend Charm to Cottage

HERE is a plan for a present-day home that has all the charm and atmosphere of the English cottage, a style of architecture growing rapidly in popularity.

The long sloping roof line of this house fits it to the ground most effectively.

Complete plans for this house may be obtained by anyone on writing to Home-plan Editor of the Edmonton Bulletin.

Attractively and make it a natural part of the surroundings.

The charm of the exterior is due in no small measure to the plaster of the windows. The walls will look equally well in smooth or rough textured finish, and any one of a variety of colors.

Features of the interior arrangement are many. The diagonal slope of the living room is unusual, while the open porch and the sun-parlor at the side add to its attractiveness.

Adjoining to the entrance are a coat closet and lavatory. From the hall a good view is had of the living room and sun-parlor, but not of the dining room.

The kitchen is well lighted by a

triple window over the sink, and has cabinets at one side and over the stove. An entry with a screen closet and pantry are provided. Note the distinctive location of the breakfast room, close to the rear door and the front hall.

The windows in the back give cross ventilation in the kitchen and a view of the street. Note the direct connection between the front hall and the semi-attached garage.

On the second floor are three bedrooms, the four feet over the entrance, a feature that appeals to the mother when left alone at night with her children. The attic is accessible and the lavatory roomy.

ALBERTA'S NEW INDUSTRY IS YOUR BIG OPPORTUNITY

ALBERTA is on the eve of a great period of oil development which will result in this province becoming one of the richest petroleum fields in the world. The noted authorities now on the ground proclaim this.

This means that the refining of petroleum and the distribution of our products, must become the leading industry of the province and one of the most profitable in Canada.

At this time—now, at the very inception of this development—you are offered an unusual opportunity of securing a share in this basic industry of Alberta under exceptionally easy conditions.

REFINERIES DISTRIBUTORS LIMITED, a new industrial company whose purpose was originally to market the "Pep" petroleum products of the Alberta Refineries Limited, has enlarged its functions and will now also operate a "Cracking Plant" which, by a new, scientific process will extract from 50 to 70 per cent gasoline from the Wainwright crude oil.

The company will build and maintain Service Stations for the distribution of "Pep" products, increasing the number of these as production is increased.

The Alberta Refineries Limited has already in operation a 1000-barrel a day refining plant and another of 500 barrels a day is projected. In addition to this the "Cracking Plant" (first unit) will have an initial capacity of 1000 barrels a day crude, or more than 300 barrels a day of gasoline.

WHEN it is considered that Canada pays out to foreign countries more than \$120,000,000 a year for gasoline, and Alberta alone expends millions in this product, it is not difficult to visualize the fact that there is a wonderful industry in its inception here now in the Refineries Distributors Limited.

Read the detailed figures elsewhere on this page, or better still, send for a representative to call on you and explain the proposition thoroughly.

Realize the earning possibilities of shares in this company and secure your interest in a concern which is bound to be one of the most important in Canada.

The big fortunes that have been made in great industrial projects have been gathered in by those with the vision, courage and enterprise to invest at the very inception

+Cracking Plant For Treating Alberta Crude

Prof. Gustav Eloff of the University of Alberta, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Plant" in the production of high grade anti-knock Gasoline from crude oil.

He claimed, and showed by tests and actual production in many fields, that by the Dubbs process, from 50 to 70 per cent gasoline is extracted from the crude and showed that from the Kevin Smith crude this percentage is always obtainable. The heavier crude from the Smack-over field is mentioned as showing "the wonderful possibilities of this process."

"One of the wonder oil fields of the United States is the Smack-over Arkansas, which is still producing 180,000 barrels per day, of which 163,000 barrels (December 31, 1925), is heavy oil. This oil, of asphaltic characteristics, is not very satisfactory as a fuel oil due to its emulsified water, high sulphur contents and other properties."

"The general inquiry when a new Smack-over well was brought in 'What will they do with it after they get it?'"

"One leading oil man stated that Smack-over 'Heavy crude' had everything in it it should not have for a refiner. Yet, despite these pessimistic statements, Smack-over heavy oil is being commercially cracked into over 50% gasoline. Smack-over heavy crude oil production of 163,000 barrels daily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved presage those which will be accomplished by the Cracking Plant in treating the crude oil from the Wainwright field, as its chemical composition and gravity of the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants are in operation or under course of construction in various parts of the world, such as Japan, Borneo, Java, and Dutch West Indies, Australia, Rumania, and many parts of the United States."

Information Coupon

TO THE REFINERIES DISTRIBUTORS LIMITED,
208 McLeod Building, Edmonton, Alberta.

Please furnish me with complete information regarding "Refineries Distributors Limited." It is understood that there is no obligation implied.

Name

Address

Refineries Distributors Limited

208 McLEOD BUILDING, EDMONTON, ALBERTA

Capitalization - \$1,000,000

90,000 Shares, Preferred, \$10 Par

100,000 " Common, \$1 "

Present Offering: The balance of a Block of 30,000 Preferred Shares at Par each Preferred Share carrying a Bonus of One Common Share.

DIRECTORS:

JOHN L. MERCER, Edmonton, Alberta, President.

H. A. STEWART, Vancouver B.C.,
Vice-President and Managing Director.
M. C. HAMMOND, Edmonton, Alberta.

J. C. C. BRENNER, Clover Bar, Alberta.
ROBERT McDONALD, Edmonton, Alberta.
W. A. TRIMBLE, Edmonton, Alberta, Secretary-Treasurer.

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each; and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 3 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 3c per gallon clear of

freight being available from this source alone at the present market prices.

Also to erect a "Cracking Plant" at a cost of \$150,000. This will have a capacity of 1,000 bbls. of crude oil and will produce from this a minimum of 500 bbls. of anti-knock gasoline every twenty-four hours. At 35 gallons to the barrel, this shows a total output of 17,500 gallons a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$525.00 per day net. This alone will show a handsome dividend on a \$1,000,000.00 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentiality for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the earnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry based directly upon natural resources, reap the rich reward.

"PEP" is the appropriate name given to the gasoline product of Alberta Refineries Limited, produced from the crude oil of the Wainwright field.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.

Marketing Company Has Contract with Refinery

Refineries Distributors Ltd., the marketing company, have a contract from the refining company which guarantees the marketing company 3c per gallon clear of freight delivered at distributing points throughout the country. That is 3c under tank wagon prices at these points. We pay our agents 1% commission and estimate a further 1% for office and overhead—leaving 3c per gallon clear profit to the marketing company.

As an example of the revenue to be derived from this source, figuring on the basis of 1000 barrels per day throughout, half of which would be fuel oil, leaving 500 barrels per day for distribution by the marketing company, 500x35 equals 17,500 gals x 3c per gal. equals \$525.00 per day net profit or \$164,325.00 net profit per year. This amount of oil can be distributed by ten bulk stations, and already we have more than this number established at a cost of \$100,000.

We have had to refuse many orders for products from other points, thus the need for expansion. In addition to this source of revenue the marketing company will build a cracking plant that will give us an additional 17,500 gals per day of straight gasoline, using Wainwright crude.

The Company is fortunate in having secured as General Superintendent of the plant, Mr. M. L. Berryman, formerly Chief Chemist and General Superintendent of some of the principal plants in the South such as the Gulf Refining Co., The Texas Company, Mexican Petroleum Co., and others. He was one of the first men in charge of the Dubbs Process and his experience has been such that he will be able to operate the refining and cracking plants economically to the very best advantage. He is a highly capable executive. He is most optimistic regarding the present project.
